## The Health/Wealth Conundrum

For those who are healthy, the odds are in favor of a long retirement. And because women live longer than men, on average, they may face higher lifetime health care costs and greater risk of outliving their savings.

Estimates are based on a 65-year-old person who retired in 2021.

# Diversifying Your Portfolio with International Flair

Global economic growth is projected to drop from a 5.8% rate in 2021 to 3.3% in 2022, as the world grapples with repercussions of the Russia-Ukraine war and ever-changing conditions wrought by the pandemic. Growth forecasts of 3.3% for the United States and 2.4% for the euro area in 2022 (down from 5.6% and 5.2%, respectively, in 2021) reflect the prospect of supply constraints along with rising inflation and interest rates. China's growth is projected to slow to 5.1% in 2022 from 8.1% in 2021 due to its zero-COVID strategy and languishing real estate sector.<sup>1-2</sup>

Investing internationally provides access to growth opportunities outside the United States, which may boost returns and/or enhance diversification in your portfolio. But foreign securities carry additional risks that may result in greater share price volatility; these risks should be carefully managed with your goals and risk tolerance in mind.

## Foreign Factors

It's more complicated to perform due diligence and identify sound investments in unfamiliar and less transparent foreign markets. Plus, there are potential risks that may be unique to a specific country.

**Politics and economic policies.** A nation's political structure, leadership, and regulations may affect the government's influence on the economy and the financial markets.

**Currency exchange.** If a domestic currency is strong against a foreign currency, purchasing power is gained when exchanging to the weaker currency. If the foreign currency continues to weaken, any investment gains and the principal may lose value when exchanged back to the domestic currency.

**Financial reporting.** Many developing countries do not follow rigorous U.S. accounting standards, which makes it more difficult to have a true picture of company performance.

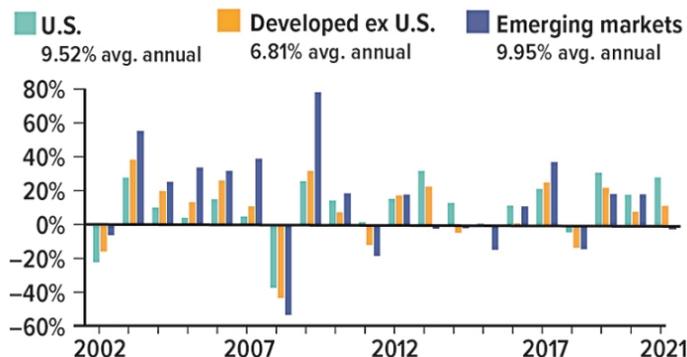

## Global Strategies

One way to invest in foreign markets is with mutual funds or exchange-traded funds (ETFs). The term "ex U.S." typically means that the fund does not include domestic stocks, whereas "global" or "world" funds may include a mix of U.S. and international stocks.

International stock funds range from broad funds that attempt to capture worldwide economic activity, to regional funds and others that focus on a single country. Some funds are limited to companies in developed nations, whereas others concentrate on nations with emerging (or developing) economies. Emerging-market stocks might offer greater growth potential, but they are riskier and less liquid than the stocks of companies located in advanced economies.

## Global Performance Picture

Stock market performance, 2002–2021  
(annual total returns and average annual returns)

Source: Refinitiv, 2022, for the period 12/31/2001 to 12/31/2021. U.S. stocks are represented by the S&P 500 Composite Total Return Index, developed ex U.S. stocks are represented by the MSCI EAFE GTR Index, and emerging market stocks are represented by the MSCI EM GTR Index; all are considered representative of their asset classes. The performance of an unmanaged index is not indicative of the performance of any specific investment. Individuals cannot invest directly in an index. Rates of return will vary over time, especially for long-term investments. Past performance is not a guarantee of future results. Actual results will vary.

It may be tempting to increase your exposure to a booming foreign market, but chasing performance might cause you to buy shares at high prices and suffer more losses when conditions shift. If you decide to spread your investment dollars around the world, be prepared to hold on during bouts of market volatility. Still, you should rebalance your portfolio periodically to help ensure that your exposure to international stocks has not drifted too far from your intended allocation — to the detriment of your long-term investment strategy.

Investors should keep in mind that selling investments in a taxable account could result in a tax liability. Diversification is a method used to help manage investment risk; it does not guarantee a profit or protect against investment loss. The return and principal value of all stocks, mutual funds, and ETFs fluctuate with changes in market conditions. Shares, when sold, may be worth more or less than their original cost. Supply and demand for ETF shares may cause them to trade at a premium or a discount relative to the value of the underlying shares.

*Mutual funds and ETFs are sold by prospectus. Please consider the investment objectives, risks, charges, and expenses carefully before investing. The prospectus, which contains this and other information about the investment company, can be obtained from your financial professional. Be sure to read the prospectus carefully before deciding whether to invest.*

# Key Retirement and Tax Numbers for 2022

Every year, the Internal Revenue Service announces cost-of-living adjustments that affect contribution limits for retirement plans and various tax deduction, exclusion, exemption, and threshold amounts. Here are a few of the key adjustments for 2022.

## Estate, Gift, and Generation-Skipping Transfer Tax

- The annual gift tax exclusion (and annual generation-skipping transfer tax exclusion) for 2022 is \$16,000, up from \$15,000 in 2021.
- The gift and estate tax basic exclusion amount (and generation-skipping transfer tax exemption) for 2022 is \$12,060,000, up from \$11,700,000 in 2021.

## Standard Deduction

Taxpayers can generally choose to itemize certain deductions or claim a standard deduction on their federal income tax returns. In 2022, the standard deduction is:

- \$12,950 (up from \$12,550 in 2021) for single filers or married individuals filing separate returns
- \$25,900 (up from \$25,100 in 2021) for married joint filers
- \$19,400 (up from \$18,800 in 2021) for heads of household

The additional standard deduction amount for the blind and those age 65 or older in 2022 is:

- \$1,750 (up from \$1,700 in 2021) for single filers and heads of household
- \$1,400 (up from \$1,350 in 2021) for all other filing statuses

Special rules apply for those who can be claimed as a dependent by another taxpayer.

## IRAs

The combined annual limit on contributions to traditional and Roth IRAs is \$6,000 in 2022 (the same as in 2021), with individuals age 50 or older able to contribute an additional \$1,000. The limit on contributions to a Roth IRA phases out for certain modified adjusted gross income (MAGI) ranges (see *chart*). For individuals who are covered by a workplace retirement plan, the deduction for contributions to a traditional IRA also phases out for certain MAGI ranges (see *chart*). The limit on nondeductible contributions to a traditional IRA is not subject to phaseout based on MAGI.

### MAGI Ranges: Contributions to a Roth IRA

	2021	2022
Single/Head of household	\$125,000–\$140,000	\$129,000–\$144,000
Married filing jointly	\$198,000–\$208,000	\$204,000–\$214,000
Married filing separately	\$0–\$10,000	\$0–\$10,000

### MAGI Ranges: Deductible Contributions to a Traditional IRA

	2021	2022
Single/Head of household	\$66,000–\$76,000	\$68,000–\$78,000
Married filing jointly	\$105,000–\$125,000	\$109,000–\$129,000

Note: The 2022 phaseout range is \$204,000–\$214,000 (up from \$198,000–\$208,000 in 2021) when the individual making the IRA contribution is not covered by a workplace retirement plan but is filing jointly with a spouse who is covered. The phaseout range is \$0–\$10,000 when the individual is married filing separately and either spouse is covered by a workplace plan.

## Employer Retirement Plans

- Employees who participate in 401(k), 403(b), and most 457 plans can defer up to \$20,500 in compensation in 2022 (up from \$19,500 in 2021); employees age 50 or older can defer up to an additional \$6,500 in 2022 (the same as in 2021).
- Employees participating in a SIMPLE retirement plan can defer up to \$14,000 in 2022 (up from \$13,500 in 2021), and employees age 50 or older can defer up to an additional \$3,000 in 2022 (the same as in 2021).

## Kiddie Tax: Child's Unearned Income

Under the kiddie tax, a child's unearned income above \$2,300 in 2022 (up from \$2,200 in 2021) is taxed using the parents' tax rates.

# Avoiding Probate

Probate is the process of proving the validity of a will and supervising the administration of an estate usually in the probate court. State law governs the proceedings in the probate court, so the process can vary from state to state. Supervising the administration of an estate can result in additional expense, unwanted publicity, and delays in the distribution of estate assets for a year or longer, which is why planning to avoid the probate process may be beneficial.

There are several ways in which assets may transfer on death directly from the decedent/owner to others without probate. The following are some of the more common ways.

**Create a living trust.** A revocable living trust is a separate legal entity that can be set up to hold assets. You can transfer most assets to a living trust while you're alive and have complete access to and control of those assets during your lifetime. You can also direct who is to receive assets held in trust upon your death. *The use of trusts involves a complex web of tax rules and regulations, and usually involves upfront costs and ongoing administrative fees. You should consider the counsel of an experienced estate planning professional before implementing a trust strategy.*

**Name a beneficiary.** Many types of contracts allow you, as the account owner, to designate a beneficiary

or beneficiaries to receive the assets directly upon your death, avoiding probate. Examples include life insurance, annuities, and retirement accounts such as IRAs and 401(k)s.

*Additional ways to avoid probate include making lifetime gifts and designating a transfer on death beneficiary for motor vehicles.*

---

**Make accounts payable on death.** Certain other types of accounts, such as bank accounts and brokerage accounts, also allow you to designate a beneficiary to inherit the account at your death without going through probate.

**Own real estate jointly or create a life estate.** Owning property jointly, as joint tenants with rights of survivorship, is another way to transfer property at death while avoiding probate. When one joint owner dies, property ownership automatically transfers to the surviving joint owner. You can also create a life estate in the property. In this case, you transfer ownership of the property to others, often called remainder beneficiaries, while you retain a life estate in the property. This means you have the right to use and control the property during your lifetime. Upon your death, complete ownership of the property passes to the remainder beneficiaries.

---

## IMPORTANT DISCLOSURES

The information presented here is not specific to any individual's personal circumstances.

To the extent that this material concerns tax matters, it is not intended or written to be used, and cannot be used, by a taxpayer for the purpose of avoiding penalties that may be imposed by law. Each taxpayer should seek independent advice from a tax professional based on his or her individual circumstances.

These materials are provided for general information and educational purposes based upon publicly available information from sources believed to be reliable — we cannot assure the accuracy or completeness of these materials. The information in these materials may change at any time and without notice.
